SUBJECT INDEX TO VOLUME 182

ANTIBIOTICS
intraperitoneal, efficacy of, to reduce incidence of infection, in trauma patient, 509
meropenem, versus tobramycin with clindamycin, in management of advanced appendicitis, 403

BILIARY TRACT
atresia, Kasai procedure for, partial splenic embolization decreases serum bilirubin level in patients with hypersplenism after, 206
ducts, common, calculi, compliment, cost-effective management of, laparoscopic transcystic duct exploration or endoscopic sphincterotomy, 488
tree, branching types classification, practical, cholangiogram, direct, analysis of, 37
Blood
hemorrhage, variceal, caused by portal hypertension, splenic venous hypertension presenting as, 63
platelets, and spleen, and plasma hepatocyte growth factor activity, role of, experimental, on hepatic regeneration, 12
pressure, high, portal, variceal hemorrhage caused by, splenic venous hypertension presenting as, 63
high, venous, splenic presenting as variceal hemorrhage, caused by portal hypertension, 63
serum, bilirubin, level, partial splenic embolization decrease, in patients with hypersplenism, following Kasai procedure, for biliary atresia, 206
Blood vessels
arteries, grafts, experimental, polytetrafluoroethylene, infrainguinal, patency, effect of external reinforcement on, 211
fistula, end-of-vein to side-of-artery, for angioaccess, alternative technique, 69
occlusion, with posterior plaques, 549
surgery, cardiac monitoring in, perioperative, improved, computerized vectorcardiography for, 530
veins, fistula, end-of-vein to side-of-artery for angioaccess, alternative technique, 69
splenic, hypertension, presenting as variceal hemorrhage, caused by portal hypertension, 63
vena cava, inferior, control, in pediatric liver transplantation, easy technique for, 555
Bones
formation, distraction, review of, for lower limb discrepancy, congenital post-traumatic or postinfective, 399
Book reviews
Atlas of Cardiothoracic Surgery, (Sabiston) [Sundt], 559
Atlas of Clinical Gastrointestinal Endoscopy (Wilcox) [Callery], 465
Atlas of Spine Surgery (Winter, Lonstein, Denis, and Smith) [Lenke], 284
Atlas of Surgical Oncology (Bland, Karakousis, and Copeland III) [Drebin], 465
Controversies in Endourology (Smith) [Balaji], 379
Minimally Invasive Surgery of the Foregut (Peters and DeMeester) [Schirmer], 284
Operative Strategies in Laparoscopic Surgery, (Phillips and Rosenthal) [Ponsky], 559
Vascular Imaging for Surgeons (Greenhalgh) [Valentine], 379
Burns
treatment, allograft, skin, cadaver, and transmission of human cytomegalovirus to, 200

CADAVERS
skin, allograft, and transmission of human cytomegalovirus, to burn patients, 200
Cancer
colon, carcinoma, metastatic, and rectum, detection, outcome after, in national hospital system, 353
esophagus, carcinoma, or gastric cardia, unresectable, Celestin intubation for, simplified method of passing a nasogastric tube in, 367
carcinoma, thoracic, lymph node dissection, extended for, localization of recurrent disease after, 340
pancreas, adenocarcinoma, surgery, prognosis, usefulness of Japanese staging in, 12
rectum, carcinoma, metastatic, and colon, detection, outcome after, in national hospital system, 353
carcinoma, total mesorectal excision, with automatic nerve preservation for, male and female sexual and urinary function after, 495
stomach, carcinoma, biopsy, endoscopically, argyrophilic nucleolar organizer region in, useful predictor of nodal metastasis and prognosis, 482
carcinoma, lesions, primary and metastatic, *c-myc* messenger RNA in, overexpression of, 55
treatment, surgeon as leader in, lessons learned from soft tissue sarcoma study, 520
Collective review
Desmoid tumors, 369
Fetal macrophage, 270
Postexcisional recurrence of carcinoma of breast, 71

DIAGNOSIS
laparoscopy, knots tied by hand and at, strength of, comparison of, 46
Disease
Crohn's, resection, ileocolonic, early recurrence and reoperation after, correlation between, 503
Drugs
alprostadil, infusion, intravenous, postoperative, does not improve renal function, in hepatic transplant recipients, 347

EDITORIAL
Cadaver skin allograft and the transmission of human cytomegalovirus in burn patients, benefits clearly outweigh risks, 262
Effective therapy: repeat limb perfusion for recurrent melanoma, 547
Pancreatic transplantation and vascular graft thrombosis, 362
Split liver transplantation, can it fulfill its potential, 449
Treatment of Type I gastric ulcer, 452
Endoscopy
percutaneous, gastrostomy, modification of "push" technique for, in infants and children, 215
Esophagus
atresia, gap length in, measurement of, outcome, simple predictor, 41
cancer; carcinoma, or gastric cardia, unresectable, Celestin intubation for, simplified method of passing a nasogastric tube in, 367
thoracic, lymph node dissection, extended, recurrent disease after, localization of, 340
surgery, technique for gastroplasty, fundus rotation, as substitute for, 241
thoracic, cancer; carcinoma, lymph node dissection, extended, recurrent disease after, localization of, 340
Eyes
endophthalmitis, endogenous, associated with pyogenic hepatic abscess, 33
lids, surgery, plastic, treatment of periorbital edema with human corticotropin-releasing factors after, 226

Extremities
lower, length, discrepancy, post-traumatic or postinfection, congenital, osteogenesis, distraction, review of, 394
perfusion, repeat, isolated, with melphalan, for recurrent melanoma of, 467
tumors, melanoma, recurrent, perfusion isolated, repeat, with melphalan for, 467

GALLBLADDER
roentgenogram, direct, analysis of, practical classification of branching types of biliary tree, 37
surgery, elective, routine preoperative infusion cholangiography versus intraoperative cholangiography, 408
Gastrointestinal tract
appendix, colic, in children, true clinical entity? 246
inflammation, advanced, antibiotic management of, meropenem versus tobramycin with clindamycin in, 403

HEART
roentgenography, vectorcardio-, computerized, for improved perioperative cardiac monitoring, in vascular surgery, 530
Hernia
inguinal, exploration and repair, laparoscopic, combined, 364
recurrent, and perivascular femoral, management of, by giant prosthetic reinforcement of visceral sac, 417
Richter's, surgical pitfall, 60

INFANTS
loop enterostomy in, and necrotizing enterocolitis, 457
surgery, and children, modification of "push" technique for percutaneous endoscopic gastrostomy in, 215
resection, liver, and infants, long-term regeneration and function after, 515
Infusion
alprostadil, intravenous, postoperative, does not improve renal function in hepatic transplant recipients, 347
Instruments and apparatus
blades, flexible, self-retaining, to facilitate "mini-incision" surgery, 454
colon, and ileum, resection, in Crohn's disease, early recurrence and reoperation after, correlation between, 503
ileum, and colon, resection, early recurrence and reoperation after, in Crohn's disease, correlation between, 503
tubes, nasogastric, passing, simplified method of, in patients undergoing Celestin intubation, for unresectable carcinoma of esophagus or gastric cardia, 367
Intestines
cancer; carcinoma, metastatic, of colon and rectum, detection, outcome after, in national hospital system, 353
colon, cancer; carcinoma, metastatic, and rectum, detection, outcome after, in national hospital system, 353
rectum, cancer; carcinoma, mesorectal excision, total, with autonomic nerve preservation for, sexual and urinary function after, male and female, 495
cancer; carcinoma, metastatic, and colon, detection, outcome after, in national hospital system, 353
surgery, mucosal, simplified method for, in children, 268
small, inflammation, and colon, necrotizing, loop enterostomy in newborns with, 457

KIDNEYS
physiology, effect of prolonged pneumoperitoneum on, experimental, 317
postoperative intravenous infusion of alprostadil, does not improve, in hepatic transplant recipients, 347

LETTERS TO EDITOR
78–79; 79; 378; 277–278; 278–279; 279–281; 282; 282–283; 462–464; 557; 557–558; 558
Liver
abscess, pyogenic, endogenous endophthalmitis, associated with, 33
excision, experimental, extended, *in situ*, effect of hypothermic perfusion with oxygenated perfluorochemical during, 219
ischemia, total, and reperfusion, experimental, Sialyl Lewis^x in, 251
perfusion, hypothermic, experimental, with oxygenated perfluorochemical, effect of, during *in situ* extended hepatectomy of, 219
regeneration, experimental, role of spleen, platelets, and plasma hepatocyte growth factor activity on, 12
long-term, and function, in infants and children, after resection, 515
surgery, resection, in infants and children, long-term regeneration and function in after, 515
transplantation, pediatric, inferior vena cava control in, easy technique for, 555
postoperative intravenous infusion of alprostadil does not improve renal function in, 347
split, preliminary experience with, 381
Lymphatic system
lymph nodes, dissection, extended, for carcinoma of thoracic esophagus, localization of recurrent disease after, 340

MUSCLES
sphincter, anal, endoscopic, or laparoscopic transcystic duct exploration, cost-effective management of complicated choledocholithiasis, 488

NERVES
cranial, vagus, excision, partial cell, and mucosal ulcerectomy for Type I gastric ulcer, 388
Nervous system
neuron, myenteric, cultured, muscarinic receptor activation in, associated with acetylcholine-induced calcium signaling, 473

PANCREAS
head, adenocarcinoma, surgery, prognosis, usefulness of Japanese staging in, 24
transplantation, vascular graft thrombosis after, risk factor analysis, operative and nonoperative, univariate and multivariate, 285
Pediatrics
liver, transplantation, inferior vena cava control in, easy technique for, 555
surgery, appendical in, true clinical entity? 246
modification of "push" technique for percutaneous endoscopic gastrostomy in, 215
rectum, mucosal, simplified method for, 268
resection, liver, and infants, long-term regeneration and function in after, 515
stomach, feeding, techniques, alternative in, 233
Peritoneal space
tumors, sarcoma, University of Florida experience, 329
Peritoneum
intra-, infection, incidence of, reduce antibiotic, efficacy of, 509
pneumoperitoneum, prolonged, experimental, effect on renal function, 317
Physician
liability under managed care, 537

ROENTGEN RAYS
diagnosis, cholangiography, direct, analysis of, practical classification of branching types of biliary tree, 37
cholangiography, routine preoperative infusion versus intraoperative, at elective cholecystectomy, 408

computerized vectorcardiography, for improved perioperative cardiac monitoring in vascular surgery, 530

SEX
function, male and female, and urinary, after total mesorectal excision, with autonomic nerve preservation, for carcinoma of rectum, 495
Skin
grafts, allo-, cadaver, and transmission of human cytomegalovirus, to burn patients, 200
split-thickness, subcutaneous injection of donor sites for, 265
Spleen
embolization, portal, decreases serum bilirubin level, in patients with hypersplenism, following Kasai procedures for biliary atresia, 206
experimental, role of, and platelets, and plasma hepatocyte growth factor activity, on hepatic regeneration, 12
hyper, following Kasai procedure, for biliary atresia, partial splenic embolization decreases serum bilirubin level in, 206
surgery, laparoscopic, stapled, 459
Stomach
cancer; carcinoma, biopsy, endoscopically, argyrophilic nucleolar organizer region in, useful predictor of nodal metastasis and prognosis in, 482
carcinoma, lesions, primary and metastatic, *c-myc* messenger RNA in, overexpression of, 55
remnant, surgery, partial, after, for benign and malignant gastric lesions, 1
cardia, cancer; carcinoma, or esophagus, unresectable, Celestin intubation for, simplified method of passing a nasogastric tube in, 367
surgery, endoscopic, percutaneous, modification of "push" technique for, in infants and children, 215
feeding, techniques, alternative, in children, 233
fundus rotation, techniques, as substitute for esophagus, 241
partial carcinoma, remnant. after, for benign and malignant gastric lesions, 1
ulcer, mucosal, and partial cell vagotomy, for Type I gastric ulcer, 388
ulcer, Type I, partial cell vagotomy and mucosal ulcerectomy, 388
Surgeon
as leader in cancer care, lessons learned from soft tissue sarcoma study, 520
good Samaritan wrongly accused of contributing to President Lincoln's death, experimental study of President's fatal wound, 431
Surgery
elective, gallbladder, routine preoperative infusion, versus intraoperative cholangiography, 408
experimental, effect of external reinforcement on patency of infrainguinal polytetrafluoroethylene arterial grafts, 211
effect of hypothermic perfusion with oxygenated perfluorochemical, during *in situ* extended hepatectomy of canine liver, 219
prolonged pneumoperitoneum on renal function, 317
good Samaritan wrongly accused of contributing to President Lincoln's death, experimental study of President's fatal wound, 431
role of, Sialyl Lewis^x in total hepatic ischemia and reperfusion, 251
spleen, platelets, and plasma hepatocyte growth factor activity, on hepatic regeneration, 12
postoperative study, adenocarcinoma of head of pancreas, prognosis, usefulness of Japanese staging in, 24
alprostadil, postoperative intravenous infusion of, does not improve renal function, in hepatic transplant recipients, 347
argyrophilic nucleolar organizer region, in endoscopically obtained biopsy tissue, useful predictor of nodal metastasis and prognosis in carcinoma of stomach, 482
computerized vectorcardiography, for improved perioperative cardiac monitoring in vascular surgery, 530
correlation between early recurrence and reoperation after ileocolonic resection in Crohn's disease, 503
cost-effective management of complicated choledocholithiasis, laparoscopic transcystic duct exploration or endoscopic sphincterotomy, 488
efficacy of intraperitoneal antibiotics, to reduce, incidence of infection in trauma patient, 509
evaluation of tissue trauma after laparoscopic and abdominal hysterectomy, measurements of neutrophil activation and release of interleukin-6, cortisol, and C-reactive protein, 423
gastric remnant carcinoma, after partial gastrectomy, for benign and malignant gastric lesions, 1
localization of recurrent disease, after extended lymph node dissection, for carcinoma of thoracic esophagus, 340
long-term hepatic regeneration and function, in infants and children, after liver resection, 515
loop enterostomy in newborns with necrotizing enterocolitis, 457
male and female sexual and urinary function, after total mesorectal excision, with autonomic nerve preservation, for carcinoma of rectum, 495
predictors of repeat cesarean delivery, after trial of labor, do any exist? 257
recurrent and perivascular femoral hernia, management of, by giant prosthetic reinforcement of visceral sac, 417
retroperitoneal sarcoma, University of Florida experience, 329
Richter's hernia, surgical pitfall, 60
split liver transplantation, preliminary experience with, 381
stapled laparoscopic splenectomy, 459
Type I gastric ulcer treated by partial cell vagotomy and mucosal ulcerectomy, 388
vascular graft thrombosis, after pancreatic transplantation, risk factor analysis, operative and nonoperative, univariate and multivariate, 285
technique, alternative, to create end-of-vein to side-of-artery fistula, for angioaccess, 69
alternative, of feeding gastrostomy, in children, 233
combined laparoscopic exploration and repair of inguinal hernias, 364
comparison of strength of knots tied by hand and at laparoscopy, 46
easy, for inferior vena cava control, in pediatric liver transplantation, 555
fundus rotation gastroplasty, as substitute for esophagus, 241
"mimi-incision," flexible self-retaining blades to facilitate, 454
occlusion of vessels with posterior plaques, 549
"push," modification, for percutaneous endoscopic gastrostomy, in infants and children, 215
simplified, for mucosal proctectomy, in children, 268
of passing nasogastric tube, in patients undergoing Celestin intubation, for unresectable carcinoma of esophagus of gastric cardia, 367
subcutaneous injection of donor sites, for split-thickness skin grafts, 265
to trim multilayered polytetrafluoroethylene grafts, 552

THROMBOSIS
vascular, graft, after pancreatic transplantation, risk factor analysis, op-

erative and nonoperative, univariate and multivariate, 285
Tissue
soft, tumor, sarcoma, surgeon as leader in cancer care, lessons learned from, 520
Transplants
grafts, allo-, skin, cadaver, and transmission of human cytomegalovirus, to burn patients, 200
arterial, experimental, polytetrafluoroethylene, infrainguinal, patency, effect of external reinforcement on, 211
polytetrafluoroethylene, multilayered, trim, method to, 552
liver, pediatric, inferior vena cava control in, easy technique for, 555
postoperative intravenous infusion of alprostadil, does not improve renal function in, 347
split, preliminary experience, 381
pancreas, vascular graft thrombosis after, risk factor analysis, operative and nonoperative, univariate and multivariate, 285
skin, grafts, split-thickness, subcutaneous injection of donor sites for, 265
Trauma
accidental, pedestrian-motor vehicle, injuries, analysis, profile by age, 17
infection, incidence, reduce, intraperitoneal antibiotic, efficacy of, 509
Tumors
melanoma, recurrent, limbs, repeat isolated limb perfusion, with melphalan for, 467
sarcoma, retroperitoneal, University of Florida experience, 329
soft tissue, surgeon as leader in cancer care, lessons learned from, 520

URINARY TRACT
function, and sexual, male and female, after total mesorectal excision, with autonomic nerve preservation, for carcinoma of rectum, 495
Uterus
delivery, cesarean section, repeat, predictors of, after trial of labor, do any exist? 257
surgery, laparoscopic and abdominal, tissue trauma after, evaluation of measurements of neutrophil activation, and release of interleukin-6, cortisol, and C-reactive protein, 423

VIRUSES
cytomegalo-, human, transmission, to burn patients, and cadaver skin allograft, 200

WHAT'S NEW IN SURGERY
Cardiac surgery, 83
Colon and rectal surgery, 89
Critical care and metabolism, 93
Gastrointestinal and hepatobiliary surgery, 100
Gynecology and obstetrics, 107
Neurological surgery, 115
Surgical oncology, 122
Ophthalmic surgery, 130
Orthopedic surgery, 133
Otorhinolaryngology, 139
Pediatric surgery. 145
Plastic surgery, 150
General thoracic surgery, 162
Transplantation, 170
Trauma and burns, 177
Urology, 185
Vascular surgery, 191
Wounds
fatal, good Samaritan surgeon wrongly accused of contributing to President Lincoln's death, experimental study of, 431
